Prusa released the printable parts for MK3s+ and the fan shroud is much better than the stock one of the Mk3s, so, for everyone who don't want to fully upgrade from Mk3s to Mk3s+ but still would like better cooling, I cut the second mounting point on the Mk3s+ fan shroud in order to make the assembly possible on a Mk3s printer :).

In order to use this you also need to download and print the Mk3s+ print fan support (print-fan-support.stl) that you can download here <https://www.prusa3d.com/prusa-i3-printable-parts/> (Original Prusa i3 MK3/MK3S MK3S+ upgrade)

Print instructions

Print with ASA/ABS, 0.2mm layer height and remove included support after printing
