### Travel Glasses Case with Carabiner/Lanyard Hole

This fully printable case is designed to protect your glasses or sunglasses when you're on-the-go to the beach, pool, or wherever else you may be going! It comes in three sizes to fit different frame styles, and features a carabiner hole for attaching to a backpack, purse, or belt loop.

### Support-Free Printing

The case is designed to be printed without supports or assembly and includes 0.3mm tolerances around the hinge, so it should be printable on most printers even if not finely tuned.

### Customization Options

The included OpenSCAD file allows you to modify the design and add your name or a personal message. Customize the font family, size, and label position!

### **TPU Shims Included**

To provide extra protection for your glasses, I've included TPU shims that can be inserted into the case. These shims can help prevent scratches and damage to your lenses.

Let me know if you'd like me to make any further adjustments!
