I recommend printing the 3mf since it has all the models in the correct orientation. You can also scale the model to your liking.

Assembly is just inserting the 2 pins in the holes and putting the top on. The side the top is facing doesn't matter since the bottom is symmetric. I didn't need to use glue since the press fit was enough.

Model files

crab_spoon_rest.3mf

crab_spoon_rest_top.stl
